internal peptidyl-lysine acetylation

regulation of his internal protein amino acid acetylation histone modification

regulation of histone

rotein deacetylation

protein dephosphorylation

peptidyl-lysine

regulation of peptidyl-tyrosine phosphorylation

protein modification by small protein removal

of protein serime/threonine kinase acti

n of protein kinase activity

peptidyl-serine phosphorylation

ulation of protein typosine kinase activity

monoubiquitinated protein deubiquitination

protein autophosphorylation
